Ingersoll Rand

Get The Most Out Of Your Investment

Save Up to $15K[1] by Switching to the 2236QTiMAX 1/2" Impact Wrench with DXS® Drive Xchange System™

[1]over 5 years

PTIA 2024 TOOL INNOVATION AWARDS WINNER

Did You Know?

The average auto repair shop spends over $4,000 per year on downtime and tool repair/ replacement costs.

DXS™ Drive Xchange System™

Less time. Less money. More high-octane performance.

The 2236QTiMAX delivers the high-powered torque and durability Ingersoll Rand® is known for — and so much more.

Featuring the patented DXS® Drive Xchange System™ that uses a proprietary spline-type interface and interchangeable drives, the 2236 lets you perform multiple jobs with one tool for frustration-free productivity. No more waiting on expensive tool replacements and repairs that slow your shop down — simply switch out worn or broken drives and get the work done.

- Use one tool for dozens of applications thanks to fast-swap DXS® anvil and socket attachments. Choose between 3/8", 1/2", and 3/4" anvil options that come in five lengths from 2 to 10 inches and DXS® impact sockets that are available in SAE and Metric, as well as Standard or Deep.
- Bring incredible performance to every task with 1,500 ft-lbs of breakaway torque from a patented motor design.
- Tight-fitting DXS® attachments deliver up to 15% more motor torque to fasteners[2] without the need for adapters – so you never lose power.

  [2]Compared to traditional square drive sockets

- A lightweight, balanced build helps your operators stay comfortable and productive throughout their shift.
